- 275 Gallon Totes

Agitation Needed Prior To Use

Take Aim At Heat Stress With Plant Food's .30 Cal

.30 Cal is a 12% Calcium Carbonate Solution that also contains Calcium Acetate concentrate. When applied to soil .30 Cal provides immediately available Calcium and extended release Calcium. .30 Cal is very effective for managing Heat Stress and Sun Burn, and can be sprayed with pesticides.

Expectations When Heat Stress Is Reduced:

- Increase the time the plant is photosynthesizing by cooling it down.
- Increase fruit yield and quality.
- Increase plant health by decreasing the plants susceptibility to insect and disease stress.

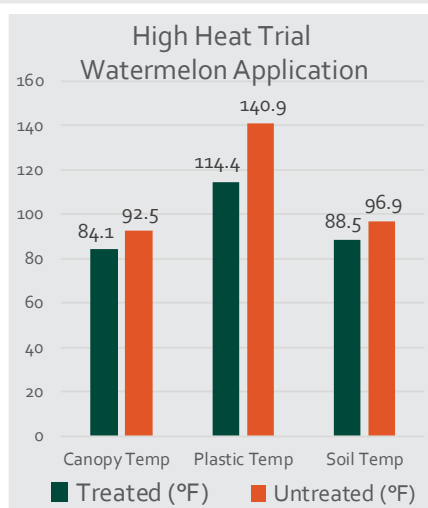

Date of Application: 7/13/17

Time of day: 1:20 pm

Air Temperature: 92°F

Rate: 1.5 gal/acre

Growth Stage: softball size fruit

“.30 Cal rinses off the fruit easily so I don't have any post-harvest issues”
